

ČD Cargo, a.s.

ČD Cargo is a modern, dynamic company that builds its future on four pillars. We are aware that it is not possible without modern vehicles and that's why interoperability is one of the pillars. A sufficient number of interoperable locomotives is a necessary precondition to fulfill the goals of the next pillar, which is expansion abroad. We hold all the necessary authorizations to operate rail freight transport in a number of European countries. The third pillar of our long-term strategy is intermodality. We are partners of all major combined transport operators. We own a property share in the terminals in Lovosice and Brno, and through our subsidiary ČD Cargo Logistics, also in the new terminal in Mošnov. At the same time, we have been preparing other similar projects. We are constantly expanding the transport portfolio using modern Innofreight technology. We are socially responsible and consider the CSR to be the fourth pillar of our business. We are proud founders of the ČD Group Endowment Fund – RAILWAY WITH HEART. We also provide transportation of humanitarian goods. Reducing energy intensity of our operations and also developing the safety ensuring system is a big commitment for us.

Expansion abroad

ČD Cargo is a carrier that already holds a license to operate rail freight transport in seven European countries. Specifically in the Czech Republic, Austria and Germany, and through its subsidiaries also in Poland, Slovakia, Hungary and Croatia.

ČD Cargo also considers Belgium and the Netherlands to be very prospective, especially due to the connection to important seaports. We already offer transport services from/to these countries. We prepare a further expansion of activities for the year 2024, when our fleet will be expanded by additional locomotives capable of operation in these countries.

Another area of interest is the Balkans, specifically Slovenia and Serbia. Here, our activities will expand through our subsidiary ČD Cargo ADRIA.
